Whole Roasted Turkey

Each Turkey is sent Par-Cooked to avoid overcooking during the reheating process.

1. Remove Turkey from refrigeration 1 hour before heating.
2. Preheat oven to 400° for 15 minutes and then lower to 350°.
3. Put Turkey in at 350°.
4. Natural juice in the pan will retain the moisture of the turkey.
5. Cover turkey tightly with aluminum foil and place in the oven.

Heat as Follows: (Depending on strength of oven)

10 - 12 lbs: 30-45 minutes

14 - 16 lbs: 45-1 hour

18 - 20 lbs: 1 hour, 15 minutes

20+ lbs: 1 hour, 45 minutes

6. Baste turkey every 15 minutes with pan drippings.
7. Remove foil during last 10 minutes of heating and baste once again.
8. Pierce thigh joint with a fork; if the juice runs clear and steaming, the turkey is ready.
9. Allow turkey to rest loosely covered with foil for 15 minutes, as it makes carving easier as well as keeps in the moisture.

Please Note: Carved Turkey's should follow Turkey Breast reheating instructions stated below.

Please note that no two ovens operate the same. The size of the oven and number of items being heated effect cooking time and oven temperature.

Our cooking instructions are generalized to accommodate the average conventional oven. We cannot assume responsibility for individual performance or variations of heating elements. If you prefer meat at a well done temperature, heat for an additional amount of time until the desired serving temperature is met.
